YACHT ENAMEL 1 K

Technical information

Product components : YACHT ENAMEL 1K (1-COMPONENT)

Volume: 750 ml
125 ml (pure white)

Product Description : 1K YACHT ENAMEL Sea-Line charactericed by:

- excellent flow
- hiding power
- stability
- high gloss
- UV and chalk resistance

Easy in application. It can be applied on laminates, steel and wood.

Applicable to exterior areas above the water line and interior areas

Physiochemical characteristics :

Colour of product:	pure white,crem,flame red,gentiane blue, jet black
Gloss:	high
Solid parts:	65%
Theoretical yield:	15 ÷ 16 m^2/l for the thickness of 40 µm
Density of the mixture:	1,00 kg/l
Coat thickness (WFT):	60 µm wet coat
Finish thickness (DFT):	40 µm dry coat

NOTICE : When performing painting works, it is recommended to use one production batch of a given product.

Preparing the surface : Before application of paint, surfaces should be primed :

- Universal Yachtprimer 1K Sea-Line®
- Epoxy Lightprimer 5:1 Sea-Line®
- Epoxy primer anticorossion 4:1 Sea-Line®
- Epoxy WOODPRIMER 10:4 Sea-Line®

Next:

- All contaminations remove by fresh water
- Primed surfaces grind :
  - Epoxy primers Sea-Line sand paper P320-P400
  - Universal Yachtprimer 1K Sea-Line does not require interlayer sanding
- Remove all sanding residues. Degrease with Cleaner Sea-Line
- Before application wait till surface dry

Conditions for application Air temperature should be higher than 5°C and paint temperature minimum 15°C
Air temperature should not be higher than 30°C

Method of application : spray gun, brush, roller

Thinner : You may dilute the mixture by adding thinner to Sea-Line 1K systems at a rate of

- Brush/roll 5÷10%
- Spray gun 5÷10%

Component mixing :

- Mix product thoroughly in can.
- Depend on application system add 1K Thinner Sea-Line
- Mix ingredient thoroughly to obtain uniform color.

Number of coats : 1÷2 layers

YACHT ENAMEL 1 K

Technical information

Hardening of coating:	**20°C**
Dry to the touch:	3 hours
Resistant against rain:	6 hours
Fully woterprof:	10 hours
Elapsed time before applying next coat :	Min 16 hours

The given times must be considered as guidelines for application of layer in thickness 40 µm DTF. The actual drying time may be shorter or longer and depends on film thickness, ventilation, humidity, underlying paint system etc.
Maximum recoating without sanding paint is applied only when the surface is free from chalking and other contamination. If the paint coating was exposed to direct sunlight, it must be clean and sanding. The removal of the top layer will provide a good grip

Pneumatic spraying parameters :

tip size : 1,2÷1,4 mm
pressure: 2,0÷2,5 bar

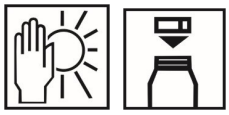

Further Work : After curing protect surface using S4 Protect Wax or S5 QUICK WAX.

Notice : Boat should not be launched until last layer of top coat will not cured

HSE conditions : Please follow safety instructions from the technical data sheet for hazardous chemical and follow Polish workplace safety laws. The general rule is to avoid contact with skin and eyes. When using the product in a small, enclosed space you must provide forced ventilation. It is also recommended that you protect your respiratory system, eyes, and skin. Be particularly careful of fire as the product may explode

Storage : Product components should be kept in tightly sealed containers, at a temperature between 5-35°C, away from sources of fire, heat, and sun rays.
Close the containers tightly immediately after every use.

Expiration date: 24 months from the date of production
