SCANSTRUT® OSCULATI

THE MARINE COLLECTION

outdoor • technologies

The Story (So Far)

Scanstrut is a global leader in marine and outdoor equipment, manufacturing cutting-edge outdoor technologies for over 40 years. We began with a passion for enabling adventure, and we've since grown into a company recognised worldwide for our quality, reliability, and innovation.

With a diverse product range of over 350 items, we enhance the use of navigation, and personal electronics in the outdoors. Our products are organized into five main categories: mounts, charge, connect, air, and seal. Scanstrut remains proudly independent, with headquarters in the UK and the USA. Over the decades, our journey has been marked by numerous industry firsts, including the development of ground-breaking mounting systems and wireless charging technologies for outdoor environments. These milestones have earned us numerous awards.

Every innovation is born in-house, driven by our talented design and engineering team who carry ideas from concept through to production. We ensure that every product meets the highest standards, trusted by customers in the toughest environments.

Our journey is one of passion, precision, and pushing boundaries, and we're excited to keep driving forward, innovating, and enabling your adventures, wherever it may take you.

SCA Introduction 06-07

Mount

Radar Mounts 08-29
Satcom Mounts 30-33
Starlink Mounts 34-35
Thermal Camera Mounts 36-37
Scanpods 38-47
Phone & Tablet Mounts 48-49

Power

USB Charging 50-57
Wireless Charging 58-69

Connect

Ventura Series 70-73

Air

Integrated Air Station 74-77

Seal

Vertical Cable Seals 78-81
Horizontal Cable Seals 82-83
Low Profile Cable Seals 84-85
Multi Cable Seals 86-87
Through Bulkhead & Junction Boxes 88-89

Safe • Certified • Approved

The testing standard at Scanstrut is encapsulated by the acronym SCA, which stands for Safe, Certified, and Approved. With over 35 years of experience and expertise in designing products for outdoor use, we design our products to be able to thrive in the harshest of outdoor environments.

Before any product is released, it must pass through our rigorous testing program which involves relevant assessments in electrical, mechanical, U.V., corrosion, thermal, and waterproof categories. To ensure the highest level of accuracy, testing is conducted both internally and by independent accredited test houses.

Our commitment to quality has earned us the approval of renowned names such as Mercury Marine, Grady White Boats, Boston Whaler, Winnebago, Airstream and many more. To learn more about our testing program and certifications, please feel free to reach out to us.

Testing Process

On Water Test
Dynamic on water testing in harsh coastal conditions. Mounted to a test vessel to evaluate its performance in rough sea states.

Corrosion Test
100-hours of a special formula salt spray that simulates accelerated marine environmental effects on the product.

IP Test
Water and dust protection under test laboratory conditions to international IP standards. We test between IPX4 (waterjet) and IP68 (submersion).

Impact Test
Drop tests to assess the impact of items falling onto our products and ensure they can withstand impacts while being used as intended.

Cable Bend Test
Electrical products are bolted into a specially designed automated jig to mechanically bend the cable -45° to +45° for 3000 cycles. This ensures cables will not fail even after prolonged use.

On Water Charge Test
Using real life on water temperature data to ensure devices will continue to charge at an acceptable speed in extreme cold and hot temperatures.

Accelerated UV Material Test
We accelerate the effects of UV exposure to replicate our products usage in extreme tropical climates. We do this to ensure parts do not become brittle, discolour or fail over time.

Humidity Chamber Test
Similar to our brutal SCA Thermal Chamber Test, but we've added humidity to make it even more punishing.

Shaker Table Test
Shock testing in X / Y / Z and +/- axis at 5G increments up to 30G to evaluate the products strength, particularly relevant for our Radar mounts.

FEA Analysis
Finite Element Analysis, simulates the behaviour of the design in virtual conditions to allow us to optimise the design before prototyping and physical testing.

30G Shock Test
Shock testing at 30G (30 times the force of gravity) to evaluate strength, particularly relevant for our Radar mounts and other powerboat products.

Material Test
Positive Material Identification (PMI) ensures consistent quality of 316 Stainless Steel and Aluminium products. This controls strength and environmental performance.

Cable Twist Test
Electrical products are bolted into a specially designed automated jig to mechanically twist the cable -45° to +45° for 3000 cycles. This ensures cables will not fail even after prolonged use.

Thermal Chamber Test
Laboratory chamber running from -40°C (-40°F) to +85°C (185°F) and back to -40°C (-40°F) for 120 cycles, this accelerates material ageing to simulate real world environment.

Temperature Chamber Test
Product placed in a laboratory chamber at high temperatures to ensure our products continue to perform as designed.

On Water Testing Global
Similar to SCA standard on water testing, however we select locations and vessels for more varied and challenging environmental conditions.

Radar Mount

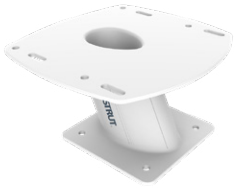

Discover the ultimate solutions for mounting your radar with our premium Radar Mounts. Engineered for stability and durability, our mounts ensure your radar operates at peak performance, even in challenging marine conditions. With easy installation and a sleek design, our mounts seamlessly integrate with your vessel while providing optimal visibility and functionality.

Aluminium PowerTower®

Scanstrut Aluminium PowerTower has been designed and engineered to install your radar on the roof, T-top, flybridge or radar arch of your powerboat, providing the clearest view of the horizon allowing you to get the best performance from your radar in all conditions.

Available in

			Compatible with
	APT-150-01 **Aluminium PowerTower®** Colour White Height 150mm / 6” Leaning Aft	GPS, VHF & Navlight Compatible Cable seal built into the top of the tower	✓ Garmin ✓ Raymarine ✓ Simrad ✓ Lowrance

- Pre-drilled mounting holes to allow radar or antenna to fasten straight to the mount
- No need to cut the radar's plugs or antenna off to install
- Marine sealant not required
- Marine-grade aluminium
- Unique 4 step marine paint system
- 2 x heights available

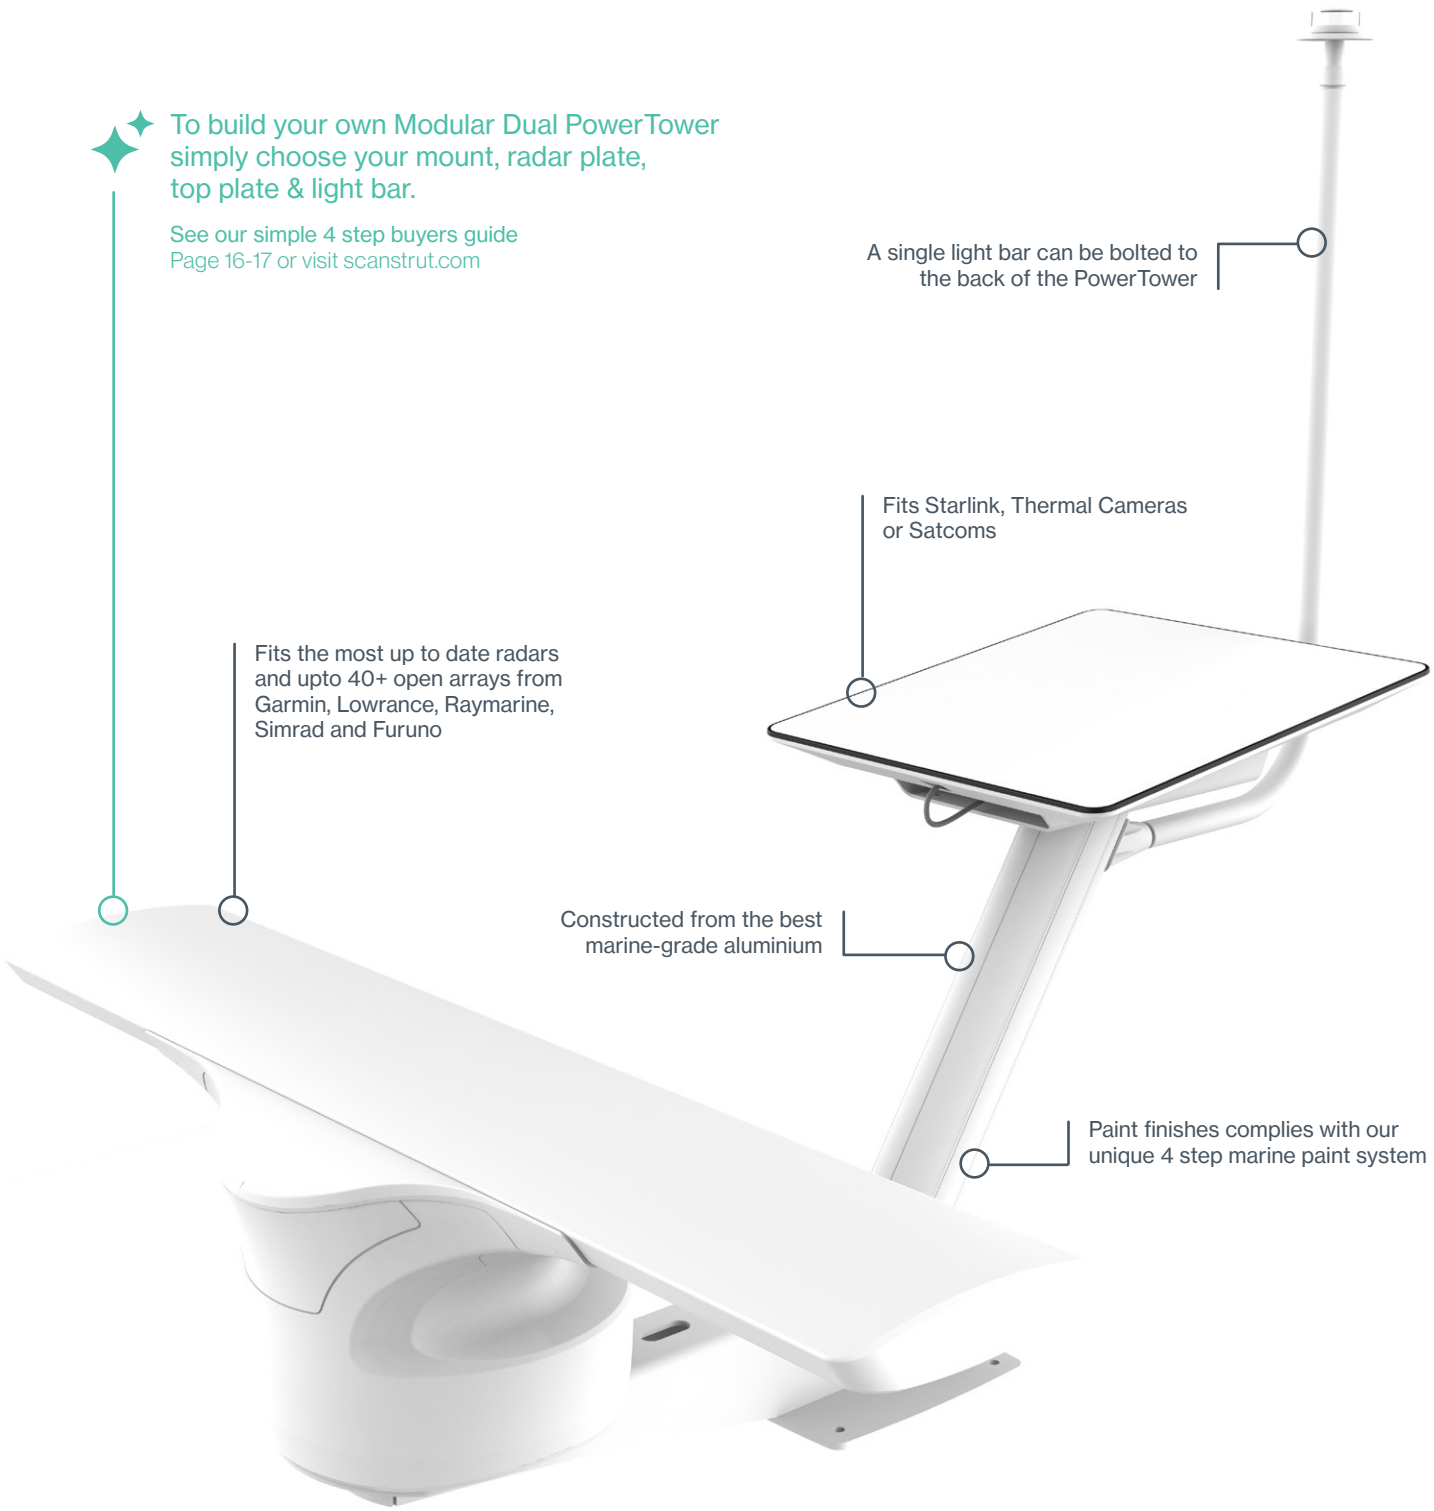

Modular Dual PowerTower®

Available in

This "off the shelf custom mount" allows the greatest flexibility for selecting a simple solution that works for your requirements. Mount 2 electronics on 1 footprint, with a choice of 3 main strut types and a range of electronics plates. The Modular Dual PowerTower has been designed to allow your open array or radar & satcom, Starlink or camera to be mounted together with or without navlights, creating that custom mount that is perfect for your boat.

To build your own Modular Dual PowerTower simply choose your mount, radar plate, top plate & light bar.

See our simple 4 step buyers guide
Page 16-17 or visit scanstrut.com

Step One Select Mount 1

DPT-R

Satcom, Starlink or Camera mounted with Radar

Standard installation

Small mounting footprint, saves space on your roof or flybridge

Compatible with

- ✓ All major radar and satcom manufacturers

DPT-R-COMP

Satcom, Starlink or Camera mounted with Radar

Compact installation

Low-profile

Small mounting footprint, saves space on your roof or flybridge

- ✓ All major radar and satcom manufacturers

DPT-OA

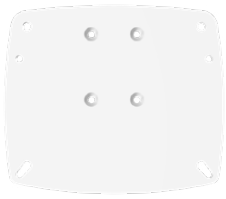

Satcom, Starlink or Camera mounted with Open Array Radar

Small mounting footprint, saves space on your roof or flybridge

Pre-drilled mounting holes allow the radar to fasten straight to the PowerTower with its own mounting bolts

- ✓ Garmin
- ✓ Raymarine
- ✓ Simrad
- ✓ Furuno

Step Two Select Radar Plate 2

DPT-R-PLATE-01

Radome Plate 1

Compatible with

- ✓ Garmin
- ✓ Raymarine
- ✓ Simrad
- ✓ Lowrance
- ✓ B&G

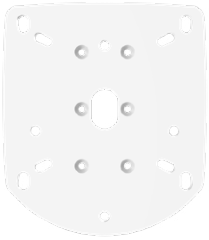

DPT-R-PLATE-02

Radome Plate

Compatible with

- ✓ Furuno

DPT-OA-PLATE-01

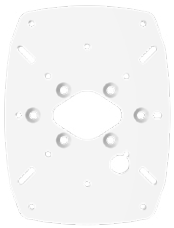

Open Array Plate 1

Compatible with

- ✓ All open array radar models

Step Three Select Top Plate

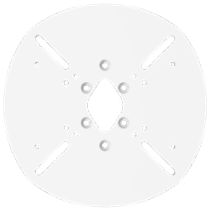

3

DPT-S-PLATE-01

Satcom Plate 1

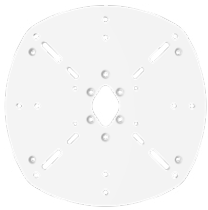

Designed for Satcoms up to 30cm (12”)

DPT-S-PLATE-02

Satcom Plate 2

Designed for Satcoms up to 45cm (17”)

DPT-S-PLATE-03

Satcom plate 3

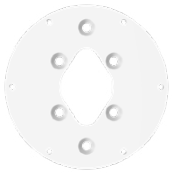

Designed for Satcoms up to 60cm (24”)

DPT-C-PLATE-01

Camera plate 1

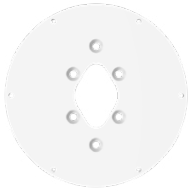

FLIR M series, Sionyx Nightwave Cameras & searchlights

DPT-C-PLATE-02

Camera plate 2

FLIR M100/200 Thermal Imaging Cameras

DPT-C-PLATE-03

Camera plate 3

FLIR M300 Thermal Imaging Cameras

SC-SL-01

Starlink

Designed to fit Starlink High-Performance

Step Four Select Lightbar

4

DPT-LB-01

Central Lightbar

For use with up to 45cm domes

DPT-LB-02

Central Lightbar

For use with up to 60cm domes & Starlink

Tapered Mast

This flagship radar mount is a single combination mount designed for radar, lights, GPS/VHF antennas, cameras, searchlights and satcom or Starlink. Each item is perfectly positioned for maximum performance.

Available in

Available on request

		Compatible with
	PTM-R1-1 **Tapered Mast • 2 Devices** Colour White Material Marine-grade aluminium Also mount lights, cameras, GPS/ VHF antenna	✓ Garmin ✓ Raymarine ✓ Simrad ✓ Lowrance
	PTM-R1-2 **Tapered Mast • 2 Devices** Colour White Material Marine-grade aluminium Also mount lights, cameras, GPS/ VHF antenna	✓ Furuno
	PTM-R1-S40 **Tapered Mast • 3 Devices** Colour White Material Marine-grade aluminium Designed to fit: 1 x Radar 1 x 40cm Satcom 1 x Vessel Camera 4 x Antenna	✓ Garmin ✓ Raymarine ✓ Simrad ✓ Lowrance ✓ KVH ✓ Flir ✓ Intellian
	PTM-R2-S40 **Tapered Mast • 3 Devices** Colour White Material Marine-grade aluminium Designed to fit: 1 x Radar 1 x 40cm Satcom 1 x Vessel Camera 4 x Antenna	✓ Furuno ✓ KVH ✓ Flir ✓ Intellian
	PTM-R1-SL **Tapered Mast for Radar and Starlink** Colour White Material Marine-grade aluminium Designed to fit: 1 x Radar 1 x Starlink Flat High-Performance 1 x Vessel Camera 4 x Antenna	✓ Garmin ✓ Raymarine ✓ Simrad ✓ Lowrance
	PTM-R2-SL **Tapered Mast for Radar and Starlink** Colour White Material Marine-grade aluminium Designed to fit: 1 x Radar 1 x Starlink Flat High-Performance 1 x Vessel Camera 4 x Antenna	✓ Furuno

Mast Mounts

Available in

The original and first choice for boat owners around the world, Scanstrut Mast Mounts are a cost-effective and space-saving solution for installing your Radome or Satcom antenna. Scanstrut range of products each specifically designed to get the maximum efficiency out of any of the leading manufactures radars and are made from marine-grade aluminium and coated with our unique 4-step marine paint system. Making sure that your mast mount stays looking its best year in, year out, whatever the oceans throw at it.

		Compatible with
	SC20 Colour White Material Marine-grade aluminium	✓ Garmin ✓ Raymarine ✓ Simrad ✓ B&G
	SC20-BLK Colour Black Material Marine-grade aluminium	✓ Garmin ✓ Raymarine ✓ Simrad ✓ Lowrance ✓ B&G
	SC18 Colour White Material Marine-grade aluminium	✓ Legacy Furuno ✓ Legacy JRC ✓ B&G
	SC21 Colour White Material Marine-grade aluminium	✓ 24” Furuno ✓ 24” Simrad ✓ 24” Lowrance ✓ B&G
	SC12 Colour White Material Marine-grade aluminium	✓ Furuno ✓ B&G

Compatible with

M92698

Colour White

Material Marine-grade aluminium

- ✓ Raymarine RD424
- ✓ Raymarine RD424HD

M92722

Colour White

Material Marine-grade aluminium

- ✓ 24” Raymarine
- ✓ 24” Garmin
- ✓ 24” Simrad
- ✓ 24” Lowrance

Radar Guards

Our polished stainless guards protect radome from damage and reduce wear on the sails.

Range Features:

- Mounted using radome bolts
- No extra fastenings required
- Easy to fit – between mast mount and radar antenna
- Manufactured from marine grade 316 stainless steel

Rayma

- Supplied with two support struts which provide maximum fore/aft and sideways support
- For racing or winter storage, simply remove the pole by unscrewing the base and remove pole, leaving just the low profile base on deck
- 2 x heights available

Pole Mounts

Available in

SC100 pole mount range installs your radar onto the deck or transom of your boat. Supplied as a complete kit, you will have everything you need for your installation. The anodized aluminium base gives choice when deciding where you wish to install the pole mount, it has a rotation of 360 degree that enables the pole to be installed on both sloping transoms and level decks. The Pole features two cable channels with a cover strip to hold cables in place and out of view. Perfect choice for the serious bluewater cruiser as you can mount various accessories including the SC120 Lifting Crane and Deck Lights.

		Compatible with
	SC101 Height 1.9m (6.4’)	
	SC102 Height 2.5m (8.3’)	
	SC103 Height:1.9m (6.4’)	
	SC104 Height 2.5m (8.3’)	
	SC120 **Lifting Crane complete with all fixings & tackle** Ideal for lifting/lowering heavy outboards, luggage, supplies onboard. Crane swings through 270° Max Lifting Weight 30kg / 66lbs	✓ SC101 ✓ SC102 ✓ SC103 ✓ SC104
	White SC-SL-01 | Black SC-SL-01-BLK Pre-drilled mounting holes allow the hardware to fasten directly to the wedge Built-in Scanstrut Cable Seal ensures a watertight installation No need to cut the Starlink connectors for installation SC103 or SC104 required to complete installation	✓ Starlink Flat High-Performance

Self Levelling Radar Mounts

Self-levelling mount range ensures your radar stays level with the horizon at all times for optimum performance.

Available in

Backstay Leveller

- Designed to fit the most up to date radars from Garmin, Raymarine, B&G and Furuno.
- Available positioned forward or aft of backstay.
- Features a fine-tuned damping system which reacts to major changes in heel angle of the boat.
- 2.6m (8'6") aluminium mounting pole, supplied in 2 lengths.
- Base can be deck, transom or chainplate mounted.
- Can be installed on both adjustable and split backstays
- Clamps around backstay allowing cable tension to be adjusted.
- Additional 0.6m (23.6") and 1.3m (51.1") lengths available to mount your radome higher.
- No power required
- Oil filled damping chamber

Mast Leveller

- Designed to fit the most up to date radars from Garmin, Lowrance, Raymarine, B&G and Furuno
- Anodised aluminium damping chamber
- 316 stainless steel radar cradle
- No power is required
- GPS/VHF accessories available
- Oil filled damping chamber

Pole Leveller

- Complete kit including base, pole, levelling cradle, deck strut & rail standoff.
- Leveller Mounted on 2.5m SC100 Pole Mount
- 316 stainless steel radar cradle
- Maintenance-free
- No power is required
- GPS/VHF accessories available
- Oil filled damping chamber

Backstay Levellers

LMB-F1

Mounts forward of the backstay
2.6m (8'6") aluminium mounting pole
No power required

- External antenna fixings for easy installation and maintenance
- Watertight installation
- Single piece composite GRP moulding or 316 stainless steel
- No need to remove connectors

Satcom Antenna Mounts

Available in

Scanstrut Antenna Mounts are manufactured from a single piece composite GRP moulding or 316 stainless steel for high strength, corrosion-free mounting. Your chosen antenna will fix on through external fixings and pre-drilled mounting holes, this makes them easy to install and maintain. All the cable routing for the antenna is through the base of the mount which leaves a clean and simple finish.

Scan for compatibility

SC30

Manufactured from a single piece of composite GRP moulding

Reduce the overall footprint of your antenna by up to 55%

External fixings and pre-drilled mounting holes

Easy to install and maintain

Scanpod

Concise and well designed, our Scanpod Range offers maximum choice and versatility for installing all leading brands of instruments and screens. The range offers contemporary styling and a unique seal and fixing system to provide full instrument protection. Ensuring you get the very highest quality installation on the market. Our Scanpods achieve the perfect viewing angle for your electronics every time.

Helm Pod	The perfect choice for all cockpit configurations. With options to fit radar displays, chart plotters and standard navigation instruments.
Deck Pod	Simply release the lever, swivel and tilt to suit your perfect viewing angle.
Rail Pod	Perfect for installations where there is limited space available.
Arm Pod	Install your MFD onto any standard or curved rail, right where you need it the most.

- Universal helm fitting
- Fits pedestal rails from 25mm to 33.7mm (0.98" – 1.33") diameter
- Saddles allow internal tube cable routing
- Watertight seal and cable entry
- Saddle system supports the stainless tubing enabling a secure and rigid fit onto any pedestal
- Quick and safe install & repeat servicing
- Pod seal is manufactured from a high tear strength silicone with a very high resistance to heat and UV
- As standard, you will receive your Scanpod uncut. For a small charge, factory cutting service is available.

Fits 7” displays or standard Instruments

Fits rails from 25mm to 33.7mm (0.98” to 1.33”)

Cables are routed internally into the rail

SPR-7-RM

Fits 7” - 8” displays

Fits rails from 25mm to 33.7mm (0.98” to 1.33”)

Cables are routed internally into the rail

SPR-8-RM

Fits 8” and 9” displays

Fits rails from 25mm to 33.7mm (0.98” to 1.33”)

Cables are routed internally into the rail

Arm Pod

Available in

Scanstrut Arm Pod allows you to install your display onto any standard or curved rail. Waterproof internal cable routing allows you to seamlessly run your cables through the bottom of the pod, through the multi-adjustable aluminium clamp and into the rail. This gives you the cleanest and most user-friendly way to mount your MFD (Multi Functional Display) right where you need it the most. Designed for both MFD's and instruments and available for 5" up to 9" displays.

Scan for compatibility

SPR-1i-AM

Fits 1 standard instrument

Fits rails from 25mm to 33.7mm (0.98” to 1.33”)

Cables are routed internally into the rail

SPR-1U-AM

Fits small screens, switches, controllers, chain counters and more

Fits rails from 25mm to 33.7mm (0.98” to 1.33”)

Cables are routed internally into the rail

SPR-7S-AM

Fits 7” displays or standard Instruments

Fits rails from 25mm to 33.7mm (0.98” to 1.33”)

Cables are routed internally into the rail

SPR-7-AM

Fits 7” - 8” displays

Fits rails from 25mm to 33.7mm (0.98” to 1.33”)

Cables are routed internally into the rail

SPR-8-AM

Fits 8” and 9” displays

Fits rails from 25mm to 33.7mm (0.98” to 1.33”)

Cables are routed internally into the rail

TILE Series

Tiny Interior Lifestyle Electronics

Available in

The Scanstrut TILE Series offers sleek, high-performance charging solutions designed specifically for marine interiors. With elegant bezel options in matte black or premium 316 brushed stainless steel, these chargers blend seamlessly into luxury marine environments. Featuring a compact 40mm square footprint and requiring just a 29mm hole saw for easy installation, the TILE Series combines functionality and style, making it the ideal choice for modernizing your vessel’s interior. Enhance your boat’s space with this practical, sophisticated solution for everyday device charging.

Range Electrical Info

Input Voltage	10-30V DC (12/24V System)
Input Current Max	6A (10A fuse recommended)
Standby Power Draw	0.01W

Important information

To maximize charge performance, use the cable supplied with your tablet, phone etc. (C to C, or C-lightning) Phones charge at the same speed on either a 12 or 24V system, but a 24V system must be used to get the full 60W output for increased charge speed with laptops.

Air

As the go-to Air on Board solutions provider, Scanstrut offers a range of off-the-shelf systems for various leisure marine inflatables, ensuring seamless integration and reliable performance. Trusted by major boat manufacturers, Scanstrut is a global leader in onboard technology solutions.

ATMOS
12V Integrated Air Station

This beautifully designed, in-built air station is here to maximize quality time on the water. At the push of a button, ATMOS is ready to inflate your paddle boards, towables and more: simply set the target pressure and let ATMOS do all the hard work. Utilizing Scanstrut outdoor technology DNA, this is waterproof on-board air that’s engineered to thrive in the harsh marine environment.

SC-AOB-A2

ATMOS 12V Integrated Air Station

Featuring next-gen air pump technology to provide fast, effortless inflation (and deflation) for your on-water toys. Compact and shallow, ATMOS fits into almost any panel on board such as seating, consoles, or near the swim platform. Now you have ready-to-go air, right where it's needed, for even more family fun on the water.

Easily installed into any panel using 10 self-tapping screws, with a foam gasket included to ensure a secure and waterproof fit. As a standard ATMOS comes with a 2.5m / 8ft hose. Alternatively a 3.6m / 12ft hose is available SC-AOB-A-HOSEV-12

At Scanstrut, our SCA standard – Safe, Certified, Approved – ensures products thrive in challenging outdoor conditions. Each product undergoes rigorous testing for outdoor reliability and performance by our internal test engineers and accredited test houses.
