INSTALLATION INSTRUCTIONS

INSTALLATION STEPS

1. Make a Ø52mm hole on panel.
2. Mount main body into Ø52mm hole, and tighten main body by fixation ring.
3. Connect the wire according to the instruction. Please note that the 12V gauge can only be used in 12V power-supply system, and 24V power-supply system for 24V gauge only.
   You can use screw to fasten the gauge and the wire, alternatively, you can mount terminal on the wire first, then connect it with gauge.
   Dimension of the metal sheet on gauge is 6.3*0.8mm.
4. For voltage gauge, no need to connect cable on S-post.
